

FARRIER SERVICES at LBEMC

Our long-time farrier and friend, Eric Enes, departed in September of this year. In order to provide ongoing horseshoeing services at the clinic, we have arranged for several exceptionally qualified farriers to be available at the clinic on different days of the week. The specific days for these farriers and their contact phone numbers are shown in the chart below.

The clinic's arrangement with these farriers is that they will be "on call" for cases seen by doctors at the clinic and which require shoeing work that day. They also have the latitude to schedule their own clients into the LBEMC farrier shed on that day. Clients of the clinic who would like to schedule with one of these farriers should contact them directly and make an appointment.

We hasten to mention that this is not a "drop in" service. The farrier who is on call for a particular day may not be present at the clinic unless a clinic case requires them to be on site or they have independently scheduled an appointment.

If you have questions about this service, please contact our front desk. We also maintain a list of well qualified farriers in our practice area; please contact the front desk for names and phone numbers. We would like to specifically thank Adam Farmer (530-305-2175); Adam is a local farrier who was on call and shod a number of horses for us while we transitioned to our current situation.
